## profile

I'm a Front End Developer seeking junior role to expand my burgeoning skills in HTML, CSS, & JavaScript.

My experience includes editing & updating existing websites, & coding from scratch static & responsive websites.

My time at FVRL included working in many departments developing both internal & external customer service skills, learning the arts of managing staff & workflow.

At Clark County, I honed my skills in development of training materials & as a trainer of a very diverse staff, learning how to collaborate with many different people, personalities, & ideas, while keeping the flow easy and productive.
